

Flexible cooking with the Bridge Function

The Bridge Function allows you to connect two separate cooking zones to create a large, unified cooking area. This means even heat distribution is created over the entire surface – ideal for bigger pots or plancha grill.

Product Benefits & Features

Maximise freedom in kitchen design

Your kitchen your way. Combining a fast, powerful induction hob with an integrated extractor enables you to plan your kitchen with fewer restrictions on hob placement.

Flexible cooking with the Bridge Function

The Bridge Function allows you to connect two separate cooking zones to create a large, unified cooking area. This means even heat distribution is created over the entire surface – ideal for bigger pots or plancha grill.

Precise power level control with Direct Touch Slider

The single Direct Touch Slider enables control of all nine PreciseHeat power levels in half-step increments for each cooking zone. Separate timers for each zone enable coordinated preparation of multiple dishes at the same time.

A fresher kitchen atmosphere for up to one year

The included OdourClean Standard Carbon filter reduces cooking odours. Easily replaced to maintain extractor's performance and a fresher kitchen atmosphere. Can also be replaced with the OdourClean Plus filter.*

*The stated lifespan is an estimate based on internal testing. Performance may vary depending on individual usage patterns and conditions; actual lifespan may be shorter or longer.

Automatic Extractor Control. Adjusts as you cook

Automatic Extractor Control allows you to focus on what matters – cooking. The hob will automatically switch on and adjust the extraction level according to your cooking activities, keeping your kitchen fresh and hands free.
