

**Smart cooling that adapts to you. Frost-free freezer**

The 700 No Frost AI CoolAssist Fridge-Freezer adapts to your daily routine, whether you're adding fresh groceries or leaving on holiday. No Frost prevents ice build-up, so you don't have to defrost.

**Product Benefits & Features**
**AI CoolAssist® – smart cooling that adapts to your routine**

AI CoolAssist® intuitively adapts fridge settings to your daily routine - whether adding groceries or leaving for vacation. AI CoolAssist® learns your habits to optimise cooling temperature, functions and saves up to 10% energy consumption\*

**TwinTech® No Frost - food kept hydrated and juicy**

TwinTech® No Frost has an advanced dual cooling system for the fridge and freezer. This technology ensures the freezer stays frost-free and the fridge humidity optimal, preventing the food from drying out.

\*Tested on 1780 CB Multichill and 1780 CB Twintech NoFrost, comparing energy consumption at 25°C with AI CoolAssist® enabled Auto Vacation Mode versus factory default settings with AI CoolAssist® off. Actual energy saving may vary, depending on environmental temperatures and usage patterns.

**Cooling every corner. Full flavour in every bite**

All-around air circulation flows cold air in every corner, through efficient air vents. Available in metal, glass, or plastic, Cooling 360° protects ingredients from freezing against the back wall, keeping your food fresh.\*

**Delicate ingredients protected, with the ExtraChill drawer**

Protect the quality, taste and freshness of cold cuts and cheese in the ExtraChill drawer. The drawer maintains a lower temperature than the rest of the fridge, with an active circulation of cold air.

The Cooling 360° design and materials may vary by market and could include metal, glass, or plastic. Product specifications and materials may vary by region. Please check with your local retailer for more details.

**A game changer – unique fridge-freezer with recycled plastic**

We're proudly introducing our unique fridge-freezer with an inner lining made of 70% recycled plastic. Plastic from discarded fridges is used to make new ones, helping reduce waste through circularity.

- Automatic defrosting of the freezer compartment
- Automatic defrosting of the cooling compartment
- Audible and visible warning signal for open door
- Audible and visual warning signal for open door and high temperature
- Fast freeze function with automatic return to normal
- Freezer drawers: 3 Full Width, Transparent Plast
- Glass shelves in the freezer
- Refrigerator lighting: Luna – 1 Top

\*Inner liner rHIPS made with up to 70% recycled plastic representing 13% of total fridge plastic\*
